

## PRODUCT DATA SHEET

## EXP-ILSRXTI Induction Loop Listener

The EXP-ILSRXTI Induction Loop Listener is a small belt pack unit, which allows the user to listen to what is being transmitted on the induction loop system, via the supplied lightweight headphones.

This easy to use device, allows the system operator to check the induction loop system, ensuring trouble free operation.

The EXP-ILSRXTI is extremely easy to use, and can be loaned to customers, should they experience a fault with their own hearing aid.

The unit is battery powered allowing it to be easily used, anywhere within the induction loop.

### Key Features

- Ideal for churches, theatres, cinemas, large conference halls and other applications where top quality sound is a must
- Allows easy testing of system, without the use of a hearing aid
- Can be used instead of hearing aid, if someone's hearing aid breaks down
- Adjustable volume control
- Supplied with light weight headphones
- Belt clip allows hands free use
- Simple and reliable
- Fully compliant with EN60118-4 (formerly BS6083) and BS7594:1993
- Uses 2 x AAA batteries
